Mehdi Ziadi

DevOps & Cloud Infrastructure Engineer

Tunis, Tunisia | Open to relocation | mehdiziadi.mzd@gmail.com | linkedin.com/in/mehdi-ziadi | github.com/Schorakbi

SUMMARY

DevOps and cloud infrastructure engineer, sole infrastructure owner at an AI SaaS startup. Migrated 1,600+ live AWS resources to Terraform, built keyless GitOps CI/CD, production observability and an LLM-powered incident investigator, and provisioned a multi-tenant AI agent platform with kernel-level isolation. Strong in AWS, Terraform, Go, Linux and security (ISO 27001).

SKILLS

Cloud: AWS (ECS, Lambda, RDS PostgreSQL, S3, SQS, SNS, DynamoDB, CloudFront, WAF, ALB, Route 53, IAM, KMS, Secrets Manager, GuardDuty, CloudTrail), Azure

Infrastructure as Code: Terraform (modules, import, drift detection), tflint, tfsec, Checkov

CI/CD & GitOps: GitHub Actions, OIDC, release-please, Jenkins, ArgoCD

Containers & Orchestration: Docker, Amazon ECS, Kubernetes, HashiCorp Nomad, Vagrant

Observability & SRE: Prometheus, Grafana, OpenTelemetry, CloudWatch, Athena, incident response, DORA metrics

Security: IAM least privilege, secrets management, DevSecOps, ISO 27001, Linux namespaces, cgroups v2, seccomp

Languages: Go, Python, Bash, SQL, HCL, TypeScript

EXPERIENCE

DevOps & Infrastructure Engineer | Sequesto (AI document-analysis SaaS), Remote **09/2025 - Present**

- Own AWS infrastructure end to end as sole infrastructure engineer: migrated 1,625 hand-built production resources (ECS, RDS, Lambda, IAM, KMS, SQS) into Terraform across 7 roots and 3 AWS accounts. Author of 89% of 660 commits and 366 merged PRs.
- Replaced manual laptop applies with keyless GitOps on GitHub Actions: OIDC roles with least-privilege IAM, tflint/tfsec/Checkov on every PR, approval-gated production applies and daily drift detection, reaching 249 automated applies at 93% success with a 3-min median.
- Cut median merge-to-production lead time by 68% (91h to 29h) and failed deployments from 18% to 3% with the team, tracked on a DORA metrics dashboard I built in Grafana.
- Provisioned infrastructure for James, a multi-tenant AI agent platform in Go: ECS on EC2 with cgroup v2 delegation, user namespaces, per-tenant FUSE file systems, seccomp/Landlock hardening and Auth0-protected ingress, live in production since 10/2026.
- Built an LLM-powered incident investigator (Go, AWS Lambda, Claude API, read-only IAM) that opens a Slack thread per alarm, inspects ECS, logs, Prometheus metrics and PostgreSQL, and posts a root-cause verdict with customer impact.
- Built observability on Amazon Managed Prometheus, Grafana, OpenTelemetry and CloudWatch: 21 production alarms (crash loops, OOM, DLQ, 5xx, RDS) and PostgreSQL slow-query insight with pg_stat_statements.
- Hardened security for ISO 27001: time-boxed IAM access through a Slack approval bot with CloudTrail audit, secrets kept out of Terraform state, GuardDuty/WAF monitoring, branch protection as code, audit architecture documents.
- Built seqctl, a Go CLI that replaced ad-hoc scripts and automates daily infrastructure work: CI/CD change detection, environment scaffolding, secrets validation, database provisioning and incident tooling.
- Leading a 15-step plan to run the platform on a self-hosted HashiCorp Nomad stack outside AWS. Delivered step 1: a hardened single-VM Nomad cluster with ACLs and private-only listeners.

DevOps Engineer Intern | MASS Analytics, Tunis, Tunisia **02/2025 - 06/2025**

- Built AWS monitoring dashboards and alerting that cut mean time to repair (MTTR) by 30%, automated deployments with Terraform to halve deployment time, and ran JMeter load tests to find performance bottlenecks.

AI Engineer Intern | SMZ, Ben Arous, Tunisia **07/2024 - 08/2024**

- Built a multimodal AI tutor (web, video and image search with document Q&A) with a Next.js front end and FastAPI back end.

EDUCATION

Engineering Degree in ICT (Telecommunications) **2022 - 2025**
National Engineering School of Tunis (ENIT)

Preparatory Cycle, Physics and Technology **2020 - 2022**
Preparatory Institute for Engineering Studies of Nabeul (IPEIN)

LANGUAGES

Arabic (native), French (fluent), English (professional), German (elementary)
